# JetBrains

We're using [IntelliJ IDEA](#) by [Jetbrains](#) to write, refactor, analyze and maintain code.

For Continuous Integration, which builds our software day-and-night, tests it and monitors its quality, we use [TeamCity](#) hosted at the [public TeamCity hosting](#) site.

# Codehaus

<http://www.codehaus.org/> gave us a home and provided the development ecosystem, including a git repository, a wiki, mailing-lists, etc.

# Atlassian

Atlassian provided JIRA/Confluence/Clover/Bamboo, which we also happily use.

# Sponsorship and donations

We will accept donations or sponsorship. Please contact us at *consult@gpars.org* with your offers.
